Challenges

COVID Fall out - debt

Huge improvements in the last few weeks

Loadshedding

Illegal mining Special Task Team

- There is a special task team developed in South Africa to address the illegal mining situation
- The task team consists of the South African Police Services and The Department of Mineral Resources and Energy
- Industry can report suspect areas to this task team
- The task team meets on a monthly basis to determine where the suspect areas are located
- It is investigated and actioned
- If it is noticed that the activity starts again, it is reported again to ensure opportunist do not go back to the areas

Input costs have been rising faster (percentage points) than the unit sales prices

Opportunities

Construction work

Road repairs

Your voice when it matters most
